As Obel Civata Sanayi ve Ticaret A.Ş., we are engaged in the production of fasteners for various sectors in domestic and international markets.

We believe that protecting the environment is of vital importance in line with our goal of ensuring a sustainable life for future generations.

In this context, through our Environmental Policy, we commit to complying with national and international standards, meeting the needs of our stakeholders, and minimizing the environmental impacts of our activities.

Our company aims to guide all employees within our own organization and throughout our supply chain towards individual lifestyle and consumption choices that are in line with environmental protection and sustainability principles.

Our Environmental Policy is a binding obligation for all our employees and stakeholders in the supply chain, regardless of their position.

Our Policy Principles and Commitments:

- We effectively monitor and comply with national and international **regulatory requirements** aimed at **reducing our environmental footprint** and manage our operations in alignment with these obligations.
- Within the scope of our approach to **combating climate change**, we focus on **energy efficiency** and implement measures to **reduce energy** consumption and carbon emissions.
- We adopt the principle of **zero discharge of hazardous chemicals** and maintain a responsible production approach throughout the entire **product life cycle**, from raw material selection to final disposal.
- We **use natural resources efficiently** and **prevent unnecessary consumption**. We carry out initiatives to **reduce water use** across all our activities, including production processes, and ensure that wastewater is treated and discharged in compliance with applicable legal requirements.
- We strive to prioritize **environmentally friendly technologies** and prefer alternatives that **minimize harm to the ecosystem** in new investments.
- We **segregate waste**, **recycle recyclable materials**, and ensure proper disposal of non-recyclable waste.
- We **continuously monitor** environmental performance indicators such as energy, water, emissions, and waste, and conduct necessary inspections.
- We adopt **continuous improvement** of our environmental performance as a core principle.

- We **raise awareness** among our employees and all stakeholders regarding environmental sustainability, foster this awareness throughout our value chain, and clearly define our expectations in this regard.
- We share our environmental performance with our stakeholders in a transparent manner.

By applying these principles, we commit to working diligently for a better future and sustainable living.
